Continuation of 3. NOTE: Claim 34 raises new issue that would require further search and consideration. Claim 34 includes the limitations of claims 29 and 31. The "first threshold" and the "second threshold" divides ranges into three parts; range A (exceeding a first threshold, recited in claim 31, line 4 and claim 34, line 2), range B (between the first and the second thresholds, recited in claim 34, lines 6-7) and range C (below second threshold, recited in claim 34, line 4). However, the proposed amendment, only recites the ranges of B and C. The limitation in claim 31 of "the interfering signal synchronization sequence finder is responsive to one of the received signal and the estimate of the residual signal, if the estimate of the carrier-to-interference-and noise ratio of the received signal exceeds a threshold (the first threshold)." has been deleted, which raises new issue that would require further search and consideration.
